About me

AI transformation and product leader with experience delivering Generative AI, machine learning, and enterprise automation initiatives in banking and enterprise environments. I bridge business strategy, product delivery, and technical architecture to turn high-value opportunities into scalable AI products on AWS.

Core expertise

AI transformation strategy · GenAI & agentic AI · AI product management · AWS cloud & serverless architecture · ML delivery & monitoring · Enterprise automation · Data strategy · Cross-functional leadership

Selected experience

AI Transformation Lead | SilkBank | Feb 2026–Present

- Define and deliver the AI transformation roadmap across customer experience, operations, and decision-support use cases.
- Prioritize opportunities by business value, feasibility, risk, and data readiness; translate strategy into delivery roadmaps.
- Lead cross-functional delivery across product, engineering, data science, DevOps, QA, security, and business stakeholders.
- Establish governance, prioritization, and delivery practices for secure, measurable enterprise AI adoption.

GenAI Project Lead | Nexus | Jun 2024 - Dec 2024

- Led delivery of a serverless, multimodal banking chatbot on AWS, enabling context-aware responses across text, images, and video.
- Aligned stakeholders and technical teams on product scope, requirements, acceptance criteria, testing, rollout, and operational readiness.
- Coordinated development, data science, QA, and DevOps teams through the full delivery lifecycle.

AI/ML Project Manager | Nexus | Jan 2024 - July 2024

- Led ML initiatives for a gaming business spanning churn prediction, LTV forecasting, uplift modeling, segmentation, recommendations, and real-time personalization.
- Converted commercial objectives into ML problem statements, KPIs, acceptance criteria, and prioritized delivery backlogs.
- Managed cross-functional data science, ML engineering, data engineering, and analytics teams; established monitoring, drift detection, and retraining practices.

Data Project Manager / Business Analyst | Nexus | July 2023 - Dec 2023

- Led data preparation for an AWS-based serverless marketplace platform, defining ingestion, modeling, data contracts, SLAs, and quality processes.
- Coordinated data engineering, analytics, and QA teams to deliver reliable pipelines and KPI dashboards.

Earlier experience

IT Project Manager | Tegeta Holding | Aug 2019–Jun 2023

- Delivered an internal logistics platform with SAP ERP and GPS tracking integrations; led requirements, API/interface specifications, UAT, training, and KPI reporting.

Technical Support Lead | SilkBank | July 2023 - Feb 2026

- Led L1–L3 technical support for digital banking and GenAI applications, including incident management, SLA/OLA governance, runbooks, and release readiness.

Additional experience: Business Development Lead / Partnership Manager, Nexus · Brand Manager, Tegeta Holding · Program Implementation Specialist, Tegeta Motors · Practitioner, Ministry of Finance of Georgia

Education & certifications

MSc, Computer Science (AI & Machine Learning) — Georgian Technical University, 2023–2025 · GPA 3.7/4.0

BA, Economics (Econometrics & Mathematical Statistics) — Ivane Javakhishvili Tbilisi State University, 2014–2018 · GPA 3.6/4.0

AWS Certified Machine Learning – Specialty · AWS Certified Cloud Practitioner · AWS Partner: Generative AI Essentials · Google Project Management Professional Certificate

Technical skills

AI/ML: Generative AI, agentic AI, machine learning lifecycle, model monitoring, drift detection

Cloud & Data: AWS, serverless architecture, Python, SQL, data engineering, Power BI

Languages: Georgian, English, Russian, German
